

The Birth of Bee Caps

In 1986 my mother, Pauline "Grandma" Hueston, was hospitalized, suffering from eight serious medical problems. The heart by-pass surgery she had experienced previously, now seemed minor. We thought we would surely lose her this time. She was released after extensive hospitalization, but us unable to walk or care for herself.

It was during this time that I met a woman visiting from Europe. She told me not to give up hope, that there were miracles in the beehive. Returning home, she sent back four bottles of bee products – **Royal Jelly, Bee Propolis, Bee Pollen, & Raw Honey.**

One major problem was Mom's Lack of appetite. Like many patients, she was not eating enough to regain her strength. Her hands too weak from crippling arthritis, she needed help opening and measuring the ingredients. I hoped that by feeding her the combination of all 4 natural bee foods, she would receive essential nutrition, and thus regain her strength. Within days, there was noticeable improvement. It worked just as my friend from Europe had promised.

I now had to devise a method that would allow Mom to take the bee products easily. Using some simple ingenuity, I ground together the contents from the four bottles and put the combined mixture into capsules. These capsules Mom was able to take with ease.

Mom continued to take her prescriptions together with the bee capsules. From an initial discharge prognosis of only 2-3 months to live, Mom's strength, energy and endurance began to improve. Miraculously, with the services of an excellent doctor, here medication, good nutrition, and trust in God, she regained her health. Grandma enjoyed many more years of life than anyone ever expected.

Observing her success, our friends wanted bee products for their own use. However, the handmade capsules were impractical to make in volume. After three years of research with the pharmaceutical chemist, we discovered a low temperature process, which allows us to combine all four natural ingredients into a single caplet without destroying essential enzymes. Since Bee Caps are food, I began marketing them through restaurants. Wonderful testimonials began to pour in from people of all walks of life. We found that anyone who wanted extra energy and the feeling of well being could benefit from taking our Bee Caps.

Sincerely, Tony Hueston

Why Bee Caps?

The most perfect food supplement money can buy. Bee Caps are a blend of the four products from the bee hive – Royal Jelly, a natural rejuvenator; Propolis, nature's most potent antibiotic; Raw Honey, an instant energy builder; Pollen, often called nature's most "perfect" food.

It was initially believed that only the elderly and convalescents would purchase our product, but unsolicited letters indicate that people of all ages and all walks of life purchase and benefit from Bee Caps. Anyone who needs an extra bit of energy or the feeling of well being that comes from an important proven diet can benefit from this fine food supplement. Bee Caps can give you that added assurance of a healthy, more complete diet.

Everyone is different, but generally taking two caplets at breakfast and two at supper works best for most people. Take four caplets per day-heavier people may want more; lighter people can use less and still get the full benefits. Experiment until you determine what's best for you. If you find that your supper time Bee Caps give you too much energy and keep you awake at bedtime, eat them during lunch instead of supper. Again, experimenting is the key!

Bee Pollen- A Complete Food

Bee Pollen contains all ingredients necessary for life and is often referred to as nature's "perfect" food. Twenty-two nutrients required by the human body are found in Bee Pollen and it has five to seven times more protein than beef. Doctors in Europe often prescribe Bee Pollen to convalescents, and athletes who use Bee Pollen report an increase in energy levels and strength. Pollen, coupled with a sensible diet, can be considered a valuable weight loss food.

The Bee Pollen in Bee Caps is gathered from all over the world and we "cross-blend" it for best results. (500 mgx per caplet)

Royal Jelly- A Natural Rejuvenator

Royal Jelly is made by worker bees and when they feed it to an ordinary female bee she becomes a queen, lives five years instead of three months and produces twice her own weight in eggs each day. Although much research has been done to determine its pharmacological nature, 20% of this compound remains a mystery to scientists. This mystery substance has maintained the hive of a species that has thrived for millions of years. Our Royal Jelly is freeze dried fresh from the hive and is the most costly ingredient in Bee Caps. (50 mgs per caplet)

- BEE CASP are manufactured WITHOUT HEAT, using a proprietary process that gives the product a shelf life over 4 years.
- BEE CAPS are alive with ENZYMES, not an inactive man-made chemical composition.
- BEE CAPS are ECONOMICAL nutrition. For only 66 cents a day you can enjoy better health, vitality & well being.

Now Available with Siberian Ginseng!

Nature Cure BEE SENG caplets contain Siberian Ginseng, one of nature's most popular herbs. It is well known for it's energy enhancing qualities and it's ability to lessen the effect of daily environmental stress, while improving mental and athletic abilities. Siberian Ginseng has also been used to help the body resist viral infections and environmental toxins. Nutrients such as Vitamin C, Betacarotene, Vitamin E, Niacin and Vitamins B1, B2, B6, and B12 are found in Siberian Ginseng. In addition the minerals include calcium, potassium, phosphorus, sodium, magnesium, barium, iron, strontium, boron, copper, manganese, chromium, cobalt, germanium, and zinc.

NOTE: Siberian Ginseng should not be used if you have hypoglycemia, high blood pressure or heart disease.

"Let your food be your medicine...

...Your medicine be your food."

Hippocrates

Raw Honey- More Than A Sugar

Honey is an instant energy building food with all the essential minerals necessary for life, seven vitamins of the B complex group, amino acids, enzymes and other vital factors. Most processed honey has been heated and filtered which destroys its nutritional value.

We freeze dry our Raw Honey in volume leaving it in its natural state to retain all the vitamins, minerals and enzymes inherent in this healthful food. At only 50 mgs, the amount of Raw Honey in each caplet equates to less than three calories.

Propolis- A Powerful Natural Antibiotic

The most sterile place in nature is the beehive. Propolis is the substance responsible for neutralizing any bacteria, fungi or virus that enters the hive and is one of the most powerful antibiotics in nature. In 1991 Columbia University published a study on the medical properties of Propolis and Europeans have found Propolis to have bactericidal and antibiotic capabilities.

We developed our own test that we use on each shipment of Propolis to assure maximum potency for you.
